NAMES & ADDRESSES

This list comprises the names and abbreviated addresses of all individuals, nurseries and estates mentioned in the Register & Checklist as playing a role in the development and registration of individual cultivars and Groups.

As in the main part of the Register & Checklist entries are in strict alphabetical order, based upon the spelling of the surname. Where more than one entry has the same surname the order is determined by the alphabetical order of any initials. Most names that incorporate de/De, van/Van or von/Von as separate elements within a name will be found listed under the alphabetical position of the word immediately following the de/De, van/Van or von/Von.

Names in parenthesis within an individual entry may refer either to the individual(s) running a nursery or may be drawing attention to where two individuals (usually husband and wife) are usually given in the main text together but are here given individual entries.
